JOSHUA LEDERBERG

PRESIDENT

Dr. William Kelly  
Professor of Medicine  
University of Michigan  
Medical School  
Ann Arbor, Michigan 48103

Dear Dr. Kelly:

Dr. William R. DeCesare was kind enough to mention that he had heard your address at the AFRC and that it might be useful to me in rounding out my perspective on the activities of clinical investigators. This would be most helpful for our strategic planning for the Rockefeller University Hospital.

If it is not too much trouble may I ask the courtesy of seeing a draft of the paper that he referred to? I would, of course, also be interested in any other publications or observations that you may have pertinent to this general theme.

Yours sincerely,

  
Joshua Lederberg
